# BRAIN TRAIN

## Rules of the game

Brain Train is a game that tests your memory and logic. It is a single player game that can be played on a mobile phone. The game consists of a series of levels that increase in difficulty. The first level is called 'Level 1'. In this level, you are presented with a circle divided into four quadrants. One quadrant is shaded black, and the other three are white. Your task is to identify the quadrant that is shaded black. The game then presents a series of questions based on the shaded quadrant. For example, if the top-left quadrant is shaded black, the question might be 'What is the color of the top-left quadrant?'. You then select the correct answer from a list of options.
